

Marketing Lane Handoff — June (Marketing Director)

— System Migration

Date: Wed Sep 24, 2026 · **Purpose:** full lane state for cold pickup by the next system. Self-contained; no chat history required. **Reports to:** Buford (Co-CEO, home base) and Noah (Founder & CEO, final say). Cross-lane contact only via cold handoffs carried by Noah.

Knowledge boundary, stated honestly: this lane's last full working session was Aug 24, 2026 (OG/favicon ship + brand guidelines), plus the Business Plan v5 review request received from Buford just before this migration. Anything that happened in other lanes since Aug 24 (Chris Smith meeting outcome, send counts, deploys) is not reflected here; reconcile against the Sonny and Dex lane handoffs dated 2026-09-24.

1. Brand canon status

Governing documents, in authority order:

1. `Interconnected_Brand_Guidelines_v1.docx + June_Brand_Guidelines_v1.md` (identical mirror; the .md is what all lanes read) — **canon since Aug 24, 2026**. Palette with hex values, dot-cross logo rules, mark sizing rule, voice, copy rules, phrase bank, approval chain.
2. `Marketing_Brand_Briefing (1).md` (legacy inheritance, mid-Aug) — accurate except where Guidelines v1 or the June onboarding brief v3 supersede it.
3. `June_Marketing_Brief (3).md` (onboarding brief v3) — v3 is in force; a v1 in circulation (rename described as live) is retired.

Canon decisions on record (all Noah-approved Aug 24):

- **Name:** Interconnected, confirmed. Never "Believers In Business," never "Interconnect." Rename question is closed; reopening comes only from Noah via home base.
- **Canonical URL:** <https://www.joininterconnected.com/> (www host; bare domain redirects). Share www where a link is shared at all.
- **Logo:** gathered dot-cross. Full 47-dot mark ≥ 48 px; 13-dot small-size variant < 48 px only (favicon, tab, tiny UI) — approved by Noah with that boundary. Never letters/text in the mark. Settled; no redesign proposals unprompted.

- **OG/link previews (shipped + deployed):** og:title name-first ("Interconnected: your church, connected every day of the week" — approved over legacy's tagline-only spec); og:description is the two-sided version (approved over the roofer line); card = mark/wordmark/tagline on solid #2563EB, no screenshot/stats. theme-color = #F7FAFF. Full spec: June_OG_Favicon_Handoff_to_Dex_2026-08-24.md.
- **Competitor naming (approved):** generic in writing — "a group text and a shared drive" — never GroupMe/Google Drive/Facebook on the landing page or in cold email. Names allowed: spoken in meetings; reactively when the pastor named them first; in an FAQ answering a real question. **Planning Center is always named, as a complement.** Confidential competition analysis (e.g., the business plan's table) is a legitimate exception per Buford, pending my confirmation in the v5 review (I agree; see §2).
- **Group visuals:** unique line icons per group (replaced monograms).

Open items on canon:

- **Taste check (STILL OPEN as of migration):** og-image.png and apple-touch-icon.png shipped without the wife taste-check (approval chain: Noah + wife for public visuals). Noah's decision note left the bracket unfilled. Status: shipped-pending-review. If vetoed, it's a re-export by Dex, not a rebuild — send her exact words.
- **Trademark knockout on "Interconnected":** Ada (Legal Counsel), backlog, required before major brand spend. The competitor-naming rationale partly rests on this being unresolved.
- **Mack's post-deploy verification checklist** (iMessage/WhatsApp/Slack/LinkedIn previews, favicon, home-screen icon — §5 of the Dex handoff): screenshots never came back to this lane. Unknown whether run.
- Believers_In_Business_Plan_v3.docx retires to archive when Plan v5 goes canon; it carries the forbidden old name — never a drafting source.

Where files live: project "InterConnected" (all June_* and claudie_* files) and Drive folder Interconnected - Marketing (June) — https://drive.google.com/drive/folders/1FM5jFE1BpuZsnBev3gCJgQYbQ_9Vd-DA (guidelines mirror + both Aug 24 handoffs). The .docx guidelines exist only as the chat download and wherever Noah saved them.

2. Queue, with status

1. Business Plan v5 review (ACTIVE — top priority, assigned by Buford, Noah has seen the draft). Scope per Buford, in priority order: (a) roadmap-vs-shown audit against

claude_Dex_Demo_Inventory_for_Sonny.md ; (b) voice/brand against Guidelines v1; (c) consistency (tagline, name, phrase bank, pricing vs. LOI range). Format back: numbered change list, taste flagged separately from rule violations. Out of scope: restructuring, financial content (deliberately deferred — standing Noah rule), Team-section operating-structure description (Noah's call, made). When done, v5 goes canon and v3 archives. **Status: v5 read in full. Audit against the demo inventory NOT yet run; review NOT delivered. Preliminary observations (unverified against inventory — the next session's first job is to verify each before flagging):**

- Encryption language appears correctly ceilinged ("Designed to be private and encrypted") in the member-experience bullet — but Traction says confidential-circle privacy is "architecturally enforced and demonstrated in the product," and Risks calls encrypted messaging an "architectural commitment." Verify both against what the demo actually shows; "demonstrated" is a shown-claim.
- 50% signup line reads as expectation, explicitly ("stated as an expectation and never as a statistic") — likely passes as written.
- Launch Sunday appears as playbook/deliverable, not a screen — likely passes; check the Roadmap and Risks mentions too.
- "prototype-proven" (Exec Summary) and "complete interactive prototype covering both sides" — confirm "complete" matches inventory scope.
- Moderation "designed for minutes per week" — check phrasing is design-intent, not shown-feature, per support/moderation watch item.
- Competition table names Facebook/LinkedIn/group texts; Planning Center named as complement. **My recommendation: agree with Buford's exception** — a confidential plan is analysis for investors, not outreach copy; the naming rule governs public-facing and cold materials. State that agreement in the review so it's on record.
- Consistency spot-checks so far: tagline correct; name usage correct throughout; pricing tiers (\$4,500 / \$7,500 / \$12,000 / custom) match the legacy briefing's indicative range — verify against the actual LOI wording; phrase bank used correctly ("answered prayers, marked as helped," "shepherding, not surveillance" — the latter appears in the insights bullet, which is the sanctioned surface, not outreach).

2. Site copy pass (PENDING — unblocked by the competitor-naming approval, never issued). Two parts: (a) instruct Dex to swap any landing-page use of brand names for "a group text and a shared drive" (his in-app copy already says "nothing to juggle elsewhere" — stays); (b) review the four landing-copy lines Dex updated for product accuracy (per onboarding brief §3) so the mental copy deck matches the live site. No handoff written yet. Note: the paste-ready Sonny note (swap the phrase in cold templates) WAS delivered to

Noah in chat Aug 24 — whether it reached Sonny's lane is unverified; his 2026-09-24 handoff should show it.

3. Launch Sunday kit structure (QUEUED — backlog item 4, not started). Pulpit script + slide template + QR handout skeleton. Promised publicly in deck and FAQ; wanted early in any pilot conversation. Was next in line before the v5 review arrived.

4. Standing watches (continuous):

- Testimonial pipeline: capture quotable pastor reactions (with permission) from Sonny's meeting debriefs. Zero social proof on site/deck as of Aug 24.
 - Positioning signal: the one-sentence church-side value line in cold emails — once pastors react in meetings, it likely becomes landing-page copy.
 - Subject line "Could I get your wisdom on something?" — review with data at 20 sends.
 - Parked until pilots: content/SEO, conferences, referral program. Accelerator applications (FDE, OCEAN, Praxis) coordinate with Pearl when her lane opens; June owns writing quality.
 - Deck slide "Committed pilot churches" — draft the moment the first LOI signs.
-

3. Standing rules this lane enforces (all lanes, canon)

- **Two-sided value prop is the spine of everything:** members join for community; the church pays for community plus insight.
- **Honest about stage, always.** Never overclaim shipped functionality; Dex's demo inventory is the source of truth for shown vs. roadmap. "Half the congregation joins" is an expectation, never a statistic. Roadmap items get "we provide" / "designed to," never "let me show you."
- **Don't plant negatives the reader hasn't raised.** No "not surveillance" in email; "shepherding, not surveillance" lives in the room and on the insights screen.
- **Ask for feedback on the whole idea,** never steer to one part.
- **Outreach: no site link, no em dashes, wisdom-not-meetings,** short humble sentences in Noah's voice, sign-offs "Much Appreciated" / "Grateful for you." Don't open with the life-group mention. The ask is always simply a meeting. Draft strong; Noah rewrites into his voice — that's the process working.
- **Competitor naming rule** (§1 above). **Planning Center** always named as complement.

- **No emoji anywhere, ever. Light mode only.** Aesthetic law: modern but timeless, neutral with one pop color; "premium, not busy."
 - **Proof points always attributed** (Pew / ~384k churches / Barna 70%).
 - **Scripture:** paraphrase with reference, sparingly, never decoration.
 - **Teammates referenced as name + title** in outputs (Noah's still learning the roster).
 - **Feedback governance:** act on patterns of 3+; single opinions are taste, unless strategically compelling. Wife = visual taste check; approval chain for anything public is Noah (+ wife on visuals).
 - **Conflict protocol:** push back once with reasoning when a request conflicts with the brand system, then execute Noah's call.
-

4. Awaiting Noah (decision inbox)

1. **Taste check verdict** on `og-image.png` + `apple-touch-icon.png` (the one unfilled bracket from his Aug 24 decision note). Assets are live; a veto is a cheap re-export.
2. **Plan v5 review delivery** — next lane session completes the audit (start at §2.1's preliminary list) and returns the numbered change list to Buford; on Noah's sign-off, v5 becomes canon and v3 archives.
3. **Confirmation relay:** did the Sonny template swap and Mack verification checklist actually execute? Both were issued Aug 24, neither confirmed back.
4. **Word-doc copy of Guidelines v1 into the project/Drive** — only the .md mirror was uploadable from the lane; the .docx travels by Noah's hand.

End of handoff. — June, Marketing Director
